PYZAP

INSECTICIDE BY C RUDDUCK

ACTIVE CONSTITUENTS:

40 g/L PYRETHRINS

160 g/L PIPERONYL BUTOXIDE

GROUP 3A INSECTICIDE

For control of a wide range of insects
including insect pests of household and
agricultural situations as per the
DIRECTIONS FOR USE table.

IMPORTANT:
READ THE ATTACHED LEAFLET
BEFORE OPENING OR USING.

CONTENTS: 250 mL

PYZAP 250mL BACK LABEL –
SIZE: 65mm wide x 90mm deep

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in closed, original container in a dry cool, well ventilated area. Avoid storage at temperatures below 15°C if possible. If product is stored below 15°C some haziness may be apparent, which will disappear on shaking container. Do not store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add spray rinsings to tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

SAFETY DIRECTIONS

Repeated exposure may cause allergic disorders. Sensitive workers should use protective clothing. Avoid contact with eyes and skin. Do not inhale spray mist. Wash hands after use.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. Phone Australia 131126.

**GENERAL INSTRUCTIONS
INSECTICIDE RESISTANCE WARNING****GROUP 3A INSECTICIDE**

For insecticide resistance management PyZap is a Group 3A insecticide. Some naturally occurring insect biotypes resistant to PyZap and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if PyZap or other Group 3A insecticides are used repeatedly. The effectiveness of PyZap on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to predict prior to use, C Rudduck accepts no liability for any losses that may result from the failure of PyZap to control resistant insects. PyZap may be subject to specific resistance management strategies.

For further information contact your local supplier, C Rudduck or local agricultural department agronomist.

MIXING / APPLICATION

Shake original container well before use. Periodically agitate suspension during application to ensure mixing. Do not store diluted insecticide. Prepare a fresh solution as necessary. Do not spray the moving parts of any machinery, electric motors or switchgear.

PRECAUTIONS

AVOID CONTACT WITH FOOD, FOOD UTENSILS, OR PLACES WHERE FOOD IS PREPARED OR STORED.

BEFORE USE – REMOVE OR COVER ALL EXPOSED FOODSTUFFS. COVER ALL DISHES AND UTENSILS AND SURFACES WHERE FOOD IS TO BE PREPARED.

AFTER USE – THOROUGHLY VENTILATE TREATED AREA. CLEAN UP THOROUGHLY BEFORE PROCESSING/SERVING RESUMES.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS
AND THE ENVIRONMENT**

Dangerous to fish and other aquatic organisms. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

PROTECTION OF PETS AND LIVESTOCK

Before spraying, remove animals and pets from areas to be treated. Cover or remove any open food and water storage containers. Cover or remove fish ponds, aquariums, etc before spraying. Dangerous to bees. DO NOT spray any plants in flower while bees are foraging.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in closed, original container in a dry cool, well ventilated area. Avoid storage at temperatures below 15°C if possible. If product is stored below 15°C some haziness may be apparent, which will disappear on shaking container. Do not store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add spray rinsings to tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

SAFETY DIRECTIONS

Repeated exposure may cause allergic disorders. Sensitive workers should use protective clothing. Avoid contact with eyes and skin. Do not inhale spray mist. Wash hands after use.

FIRST AID

The resistant individuals can eventually dominate the insect population if PyZap or other Group 3A insecticides are used repeatedly. The effectiveness of PyZap on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to predict prior to use, C Rudduck accepts no liability for any losses that may result from the failure of PyZap to control resistant insects. PyZap may be subject to specific resistance management strategies.

For further information contact your local supplier, C Rudduck or local agricultural department agronomist.

MIXING / APPLICATION

Shake original container well before use. Periodically agitate suspension during application to ensure mixing. Do not store diluted insecticide. Prepare a fresh solution as necessary. Do not spray the moving parts of any machinery, electric motors or switchgear.

PRECAUTIONS

AVOID CONTACT WITH FOOD, FOOD UTENSILS, OR PLACES WHERE FOOD IS PREPARED OR STORED.

BEFORE USE – REMOVE OR COVER ALL EXPOSED FOODSTUFFS. COVER ALL DISHES AND UTENSILS AND SURFACES WHERE FOOD IS TO BE PREPARED.

AFTER USE – THOROUGHLY VENTILATE TREATED AREA. CLEAN UP THOROUGHLY BEFORE PROCESSING/SERVING RESUMES.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS
AND THE ENVIRONMENT**

Dangerous to fish and other aquatic organisms. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

PROTECTION OF PETS AND LIVESTOCK

Before spraying, remove animals and pets from areas to be treated. Cover or remove any open food and water storage containers. Cover or remove fish ponds, aquariums, etc before spraying. Dangerous to bees. DO NOT spray any plants in flower while bees are foraging.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in closed, original container in a dry cool, well ventilated area. Avoid storage at temperatures below 15°C if possible. If product is stored below 15°C some haziness may be apparent, which will disappear on shaking container. Do not store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add spray rinsings to tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

SAFETY DIRECTIONS

Repeated exposure may cause allergic disorders. Sensitive workers should use protective clothing. Avoid contact with eyes and skin. Do not inhale spray mist. Wash hands after use.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. Phone Australia 131126.

THIS PAGE INTENTIONALLY BLANK

PyZap Natural Pyrethrum Insecticide contains pyrethrum extracted from pyrethrum daisies. The natural extract is formulated with other synthetic constituents to optimize effectiveness.

DIRECTIONS FOR USE

RESTRAINTS: DO NOT apply if rain is expected within 2 hours.

CROP/SITUATION	PEST	RATE	CRITICAL COMMENTS
Vegetables	Ants, aphids, thrips, caterpillars, Leafhoppers, whiteflies	Mix 2 mL per 1 L of water	Apply as a fine mist spray when infestation occurs. Pests must be contacted with spray.
Ornamentals	Ants, aphids, thrips, caterpillars, Leafhoppers, whiteflies	Mix 2 mL per 1 L of water	Apply as a fine mist spray when infestation occurs. Pests must be contacted with spray.
Ferns, Indoor Plants	Ants, aphids, thrips, caterpillars, Leafhoppers, whiteflies	Mix 2 mL per 3 L of water	Apply as a fine mist spray when infestation occurs. Pests must be contacted with spray.
Domestic, commercial, industrial and public buildings including: Food processing establishments, shops, factories, hotels and motels, ships, shipping containers, offices, schools, storerooms, warehouses, hospitals, barracks, private houses and external areas associated with such establishments. Agricultural buildings including: storage sheds, milking sheds, poultry sheds, barns, kennels and stables.	Flies, mosquitoes, ants, silverfish, moths, cockroaches, grain weevils, spiders, earwigs, beetles and other flying insects	<u>Space Spray or fog</u> Dilute in water 1 L per 9 litres	<u>Space Spray as mist:</u> 1 litre PyZap per 2800 cubic metres. Flying insects – direct spray or fog to all parts of the area.
		<u>Surface Spray</u> Dilute in water 1 L per 9 litres	<u>Surface Spray:</u> 1 litre per PyZap 60-80 square metres. Crawling insects – direct spray into cracks and crevices.
		<u>Thermal Fogging</u> Dilute with refined mineral oil 1 L per 9 litres	<u>Thermal Fogging:</u> space spray as fog, 1 litre PyZap per 1400 cubic metres. Can be applied through the following thermal fogging machines: Dynafog, Golden Eagle, Swingfog SN11, Pulsfog, Tifa and Leco.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHOLDING PERIOD: DO NOT PICK EDIBLE PLANTS FOR 1 DAY AFTER SPRAYING.

GENERAL INSTRUCTIONS
INSECTICIDE RESISTANCE WARNING

GROUP 3A INSECTICIDE

For insecticide resistance management PyZap is a Group 3A insecticide. Some naturally occurring insect biotypes resistant to PyZap and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if PyZap or other Group 3A insecticides are used repeatedly. The effectiveness of PyZap on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to predict prior to use, C Rudduck accepts no liability for any losses that may result from the failure of PyZap to control resistant insects.

PyZap may be subject to specific resistance management strategies. For further information contact your local supplier, C Rudduck or local agricultural department agronomist.
